About BIOX Corporation

BIOX is a renewable energy company that owns 287.5 million litres of nameplate biodiesel production capacity at plants located in southern Ontario and Houston, Texas. BIOX has an innovative, proprietary and patented production process that is capable of producing the highest quality, renewable, clean burning and biodegradable biodiesel fuel utilizing a variety of feedstocks - from pure seed oils to animal fats to recovered vegetable oils with no change to the production process. BIOX's high quality biodiesel fuel meets North American (ASTM D-6751) quality standards.
